LEGAL NOTICE.

ALL persons are hereby notified that appeal has been perfected by Judge William Mack, to the Supreme Court of the United States, in the matter of his suit against Levy, Dreyfus & Co. for infringement of the Mack Opera Glass Holder patents. This appeal is to test the question whether or not the so-called "loop" opera glass holder is an infringement. In case the decision shall be favorable to Judge Mack, *all persons* who manufacture or sell infringing opera glass holders will in due time be held in damages for such infringement.

A suit is also pending against the Spencer Optical Manufacturing Co. for infringement of Judge Mack's opera glass holder patents.

How a Jeweler May Become an Optician.

THE question is often asked: Do the people who wear glasses really need them? A competent person is required to give the answer. It is natural for people to go to a JEWELER to avoid the expense of an oculist's prescription. To prescribe glasses instruction is necessary regarding defects of vision and how to remedy them. For full particulars as to fitting eyes in a PRACTICAL and SCIENTIFIC manner, Jewelers are requested to address the

FAC-SIMILE OF TAGS.

THE OHIO RETAIL JEWELERS' ASSOCIATION, at the Annual Convention held in Toledo on June 10, 11 and 12, 1890, purchased at random plated chains of all well-known makes and without the knowledge of the manufacturers subjected them to the Government assay. In an official Government report the chain bearing W. & S. Blackinton's trade mark, "W. & S. B.*," was declared to contain the most fine Gold.

An impartial test of this character differs materially from one made by the manufacturer under his own conditions and for his own benefit.

At the Annual Convention of the Ohio Retail Jewelers' Association, held on June 9, 1891, at Canton, in that State, the W. & S. B.* plated chain was again recommended and was again awarded the merit of assaying more gold than any other manufacturer's make, and this with the W. & S. B.* chain weighing one pennyweight less than any competing brand.

SILVERWARE MANUFACTURERS!

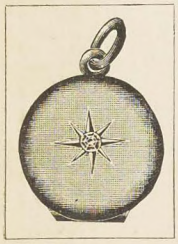

Do you know what you can ***SAVE*** by using our lathe? You can save *210 square feet of shop room.* You can save the cost of five hand lathes! You can save the wages of between seven and eight men! Why? Because on very irregular work our lathes will do the work of eight hand lathes; you can buy one of our lathes for what three hand lathes would cost, so you save the price of five hand lathes, because 8—5=3. You save the wages of seven men and part of the wages of the eighth man, because the eight men who run the hand lathes are skillful and the one man who runs our lathe is not skillful; **all he has to do is to pull a lever.**

THE JEWELERS' WEEKLY IS THE

41-43 Maiden Lane, New York. **Pioneer Weekly.**

1. Advertise in a paper that has a *large guaranteed circulation.*
2. Advertise in a paper that can give your advertisement, whether large or small, *a good position*, that is next to, or opposite reading matter.
3. Advertise in a paper that furnishes all the news and has some literary and artistic features to offer, so as to attract *readers who shall see your card.*
4. Advertise throughout the year, if you are going to advertise at all. A *purchaser may be looking for something in your line* just when you are not advertising.

THE WEEKLY guarantees to give you the largest aggregate circulation among the trade journals. *Its books and post-office receipts are always at your disposal.* It can give your advertisement a good position, its news department is acknowledged to be the best in the field, and its artistic features make it a welcome and eagerly-awaited visitor in every city, town and hamlet of every State in the Union and Canada.

THAT the above is a very true saying anybody can see by the growth of our business. We started in business a few years ago without a single jewelry customer on our books. To-day we have the cream of the trade. The secret of this is we have made good work—the best that could be had anywhere—and we sold it at a fair profit, without any extra charge for our trade mark on the goods. This style of doing business (being something new) seemed to take with the trade, and even the most skeptical who placed their first order with the firm conviction that they were throwing their money away by so doing were forced to confess that our work was the best they ever had, and that they saved money every time they dealt with us. Our telescope cases (both in canvas and leather) are the handsomest, strongest and lightest, and we have several patent appliances for carrying trays, etc., which are very popular. Our Trunks are as good as any you have ever had, and our Raw Hide Trunk is the **best Trunk** ever made.

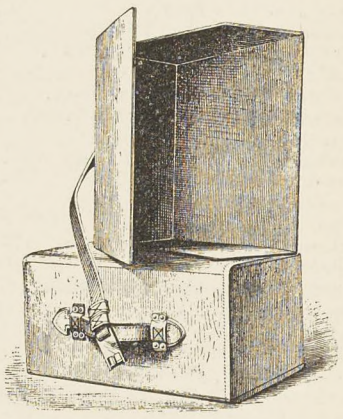

If you have never dealt with us give us a trial. It won't cost you much and may do you good. We can do your repairing at a moment's notice.

USE THE CR

AMERICAN MAINSPRINGS

FOR ALL KINDS OF AMERICAN WATCHES.

NOTICE.

All springs without this trade mark CR on them are imitations. Buy only the genuine and look for the trade mark CR on each spring. The well-known reputation of the CR Spring, for which we have had the sole agency for the United States for 38 years, has induced others to sell an imitation as being "equally as good" as the "Robert Spring," but which are of an inferior quality. **There is but one "CHARLES ROBERT SPRING." None others equal it in finish or temper.**
